

# 1. IDEAS

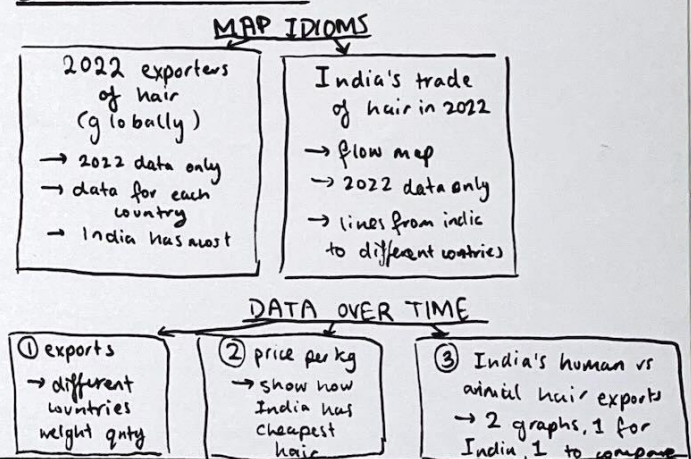

TITLE: The Human Hair Trade SHEET: 1  
AUTHOR: Ellen Costaras TASK: FIT3179  
DATE: 21/09/23 Data Visualisation 2

## 2. FILTER

## 3. CATEGORISE

## 4. COMBINE & REFINE

Vega Lite can only do proportional symbol maps:

Grid lines & country borders in grey

Vega Lite can't do flow maps:

Vega Lite can't do waffle charts:

## 5. QUESTIONS

- 1) does Vega Lite support these idioms?
- 2) do the chosen graphs do a good enough job of displaying the data?
- 3) Are the idioms suitably alternative to be interesting?

# LAYOUT:

## THE HUMAN HAIR TRADE

### INDIA'S TRADE PARTNERS

### PRICE PER KG OVER TIME

### QUANTITY EXPORTED OVERTIME

### POPULARITY COMPARED TO ANIMAL HAIR

TITLE: The Human Hair Trade

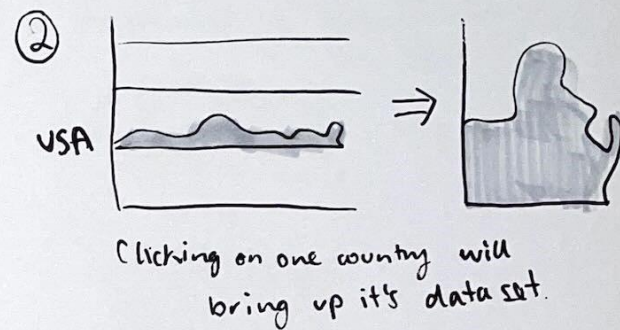

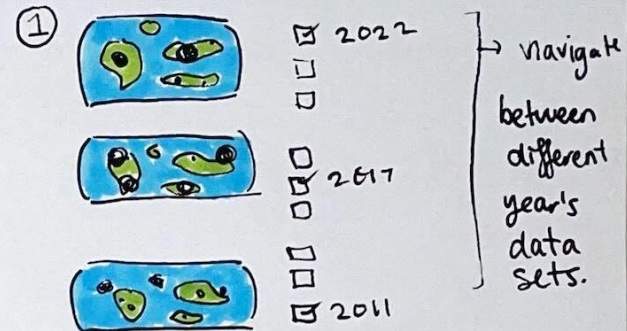

AUTHOR: Ellen Costaras

DATE: 26/09/23

SHEET: 2

TASK: FIT 3179 Data Visualisation 2.

## OPERATIONS:

## FOCUS:

### The Storyline:

- beginning: establishes India as outlier using proportional symbol map
- middle: discusses reasons why India might be an outlier (showing cheap price with heat map & increased commonality with timeline where India stands out)
- end: discuss market in India, and compare to animal hair market

### TOOLS:

Tooltip Annotation on proportional symbol map

use of colour to highlight India

## DISCUSSION:

### Pros:

- good storyline/narrative structure is well communicated by the layout
- utilises white space well
- doesn't feel clustered or gross

### Cons

- similar layout to Data Visualisation 1 submission
- not sure if Vega lite can do the interactivity features

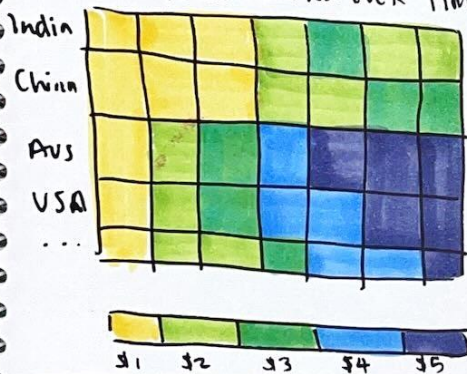

# LAYOUT:

## THE HUMAN HAIR TRADE

## PRICE PER KG OVER TIME BY COUNTRY

## EXPORTS OVER TIME

TITLE: The Human Hair Trade  
AUTHOR: Ellen Costaras  
DATE: 26/09/23  
SHEET: 3  
TASK: FIT3179 Data Visualisation 2

## INTERACTIVITY/OPERATIONS:

- Changing years for the proportional symbol map

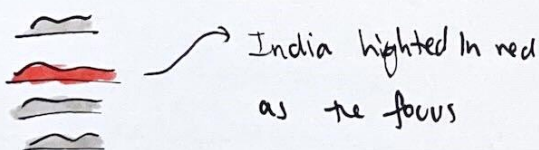

- Choose which country to compare in the stream chart

## FOVE FOCUS:

- 2 column layout utilizes the length of the small multiples chart

- Map at the top left in the main diagonal sight line

## DISCUSSION:

### Pros:

- utilizes the length of the small multiple charts
- easy, simple text blocks

### Cons:

- the maps feel slightly small and squashed.
- the 2 columns are not of equal size.

## LAYOUT:

### WORLD HAIR TRADE

### 2022 EXPORTS

### PRICE PER KILOGRAM OVERTIME

TITLE: The Human Hair Trade

AUTHOR: Ellen Costaras

DATE: 26/09/23

SHEET: 4

TASK: FIT3179 Data Visualisation 2

## OPERATIONS:

- clicking on one of the small multiples brings up a graph of that multiple larger E.g:

- swap out different countries for comparison in stream graph

## FOCUS:

- ~~The map proportional symbol map is the main focus of the visualisation~~

- The proportional symbol map is the main focus of the visualisation

central placement draws focus  
BUT:

- the portrait page orientation may mean the user has to scroll down to see it properly
- because it's wider than it is long, it's size is bound by the page width

## DISCUSSION:

### Pros:

- The map takes importance in the middle
- columns are equal

### Cons:

- The main diagonal slight line starts with text. Not ideal
- Not many interactions
- These drawbacks from the focus

## LAYOUT:

### THE HUMAN HAIR TRADE

#### 2022 GLOBAL EXPORTERS

2022  
2017  
2011

#### 2022 INDIA

#### PRICE PER KG OVER TIME

#### ANIMAL VS HUMAN EXPORTS

## FOCUS:

- Takes the good story-line from sheet 2

START: the proportional symbol map, main focus and establishes India as an outlier

MIDDLE: focus on growth over time and price over time to suggest a reason why India is outlier

END: a peculiarity within India's hair market, and a pretty graph that uses the width well

- Takes the small multiple variation from sheet 4 to allow operation.

OLD SMALL MULTIPLE VS NEW SMALL MULTIPLE

TITLE: The Human Hair Trade

AUTHOR: Ellen Costaras

DATE: 26/09/23

SHEET: 5

TASK: FIT3179 Data Visualisation 2

## OPERATIONS:

→ user can select year they want to view on proportional symbol map

→ user can click on a small multiple to see it enlarged and access tooltips

## DETAILS:

### DEPENDENCIES:

- unsure if Vega Lite is able to do the first operation above
- quite advanced operations in general
- ability to support tooltips & annotations in a way that doesn't interfere with other graphs

### TIME TO BUILD:

- Homework wk 9 & wk 10 will have already helped me build some

MAP 1: 3hrs  
MAP 2: 3hrs  
HEATMAP: 3hrs  
SMALL MULTIPLE: 3hrs  
ALGORITHMS:  
STREAM GRAPH: 3hrs  
TEXT: 2hrs  
TOOLTIPS/ANNOTATIONS: 2hrs  
OPERATIONS: 2hrs  
PERFECTING: 1hr  
TOTAL TIME: 22 hrs

- simple algorithm to calculate the price per kg and put into a dataset with

	2022	2021	...
country 1	\$ /kg	\$ /kg	\$ /kg
country 2	\$ /kg	\$ /kg	\$ /kg
...	\$ /kg	\$ /kg	\$ /kg
